

# JOHNSON MARCH SYSTEMS, INC.

## AIR QUALITY CONTROL SYSTEMS

### DESIGN ADVANTAGES

- Fabricating since 1978
- ISO 9001 Certified by UL
- Professional engineers
- Experience in Power, Oil, Gas, Mining, Wastewater, Cement, Petrochemical, LNG, etc.
- Chemical Feed Systems, Sampling Panels, Electrolytic Chlorination, Ammonia Systems, Dust Suppression
- Single contact point for multiple packages on project
- Prefabricated enclosures
- In house fabrication
- Sandblasting & painting
- Electronics and programming JBox, Control Panel, DAS, PLC
- Heavy duty construction, NEMA, explosion proof
- Custom designed to meet your specifications
- Attention to operator safety
- Installations in 6 continents and 47 countries
- Foreign Language manuals

Systems for reducing levels of Nitrogen Oxides (NOx), Mercury, dust from coal and ore, odor, and other emissions and airborne particulates released to the atmosphere.

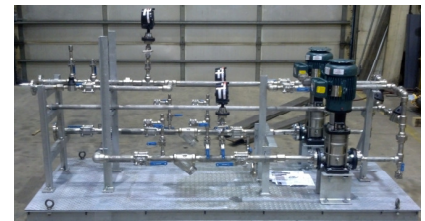

### TYPES/USES

- Ammonia Systems - Reduce NOx
- Mitigation Systems - Reduce Mercury & Sulfur dioxide emissions
- Wet Dust Suppression Systems - Reduce Airborne Particulates
- Odor Control - Reduce Odors at Landfills and Trash Plants

### OPTIONS

- Access Platforms & Ladders
- Galvanizing
- Prefabricated Buildings
- Sunshades
- Anhydrous Ammonia Rain Showers
- Vertical or Horizontal Tanks
- Single Wall or Double Wall Tanks

### CUSTOM FEATURES & PARTS

**Ammonia Unloading Skids:** Transfer Pumps, SS Suction/Discharge and Bypass Piping, Valving and safety controls, Pump Reliefs>Returns

**ASME Code Storage Tanks:** SS/CS Tanks(250-30,000 gal), Pressurized Tanks, Level-Pressure-Temperature Indicators, Vapor Returns, Pressure Relief Valves, Tank Supports

**Ammonia Transfer Skids:** Transfer/Metering Pumps, SS Suction/Discharge Piping, Valving and safety controls, Pump Reliefs>Returns, Injection Modules
