

JOHNSON MARCH SYSTEMS, INC.

CHEMICAL DOSING SYSTEMS

DESIGN ADVANTAGES

- Fabricating since 1978
- ISO 9001 Certified by UL
- Professional engineers
- Experience in Power, Oil, Gas, Mining, Wastewater, Cement, Petrochemical, LNG, etc.
- Chemical Feed Systems, Sampling Panels, Electrolytic Chlorination, Ammonia Systems, Dust Suppression
- Single contact point for multiple packages on project
- Prefabricated enclosures
- In house fabrication
- Sandblasting & painting
- Electronics and programming JBox, Control Panel, DAS, PLC
- Heavy duty construction, NEMA, explosion proof
- Custom designed to meet your specifications
- Attention to operator safety
- Installations in 6 continents and 47 countries
- Foreign Language manuals

Contains tanks for storage and associated pumping system for injecting chemicals into the process stream and other designs and applications such as transfer systems.

Phosphates, amines and acids for pH control, inhibitors to prevent scale deposits and corrosion, chlorines for killing algae and other biological growth, odorants, methanol injection, antifoam, polymers, drag reduction, and various other chemicals

TYPES / USES

- Chemical Dosing Systems for Boilers & Cooling Towers
- Transfer Systems for Service Water & Fuel Oil
- Wastewater Facilities
- Process Additives for Petrochemicals
- Tote Systems

OPTIONS

- Prefabricated Buildings
- Sunshades
- Access Platforms & Ladders
- Galvanizing
- Containment

CUSTOM FEATURES & PARTS

- Tanks Fabricated of SS, CS, FRP
- Tank Lining
- ASME Section VIII Code Stamp Tanks
- Metering, Centrifugal, Gear Pumps
- Pump Capacity Controls
- Pump Variable Speed Drives
- Heat Tracing & Insulation
- Welded Steel Channel Skids
- Spill Containment
- PLC, Control Panels, JBOX
- Agitators
- PVC and Fiberglass Piping Systems
- Lined Piping Systems
- Special Testing
- Alloy Pipe Welded Piping Systems
