

# JOHNSON MARCH SYSTEMS, INC.

## DUST AND ODOR SUPPRESSION SYSTEMS

### DESIGN ADVANTAGES

- Fabricating since 1978
- ISO 9001 Certified by UL
- Professional engineers
- Experience in Power, Oil, Gas, Mining, Wastewater, Cement, Petrochemical, LNG, etc.
- Chemical Feed Systems, Sampling Panels, Electrolytic Chlorination, Ammonia Systems, Dust Suppression
- Single contact point for multiple packages on project
- Prefabricated enclosures
- In house fabrication
- Sandblasting & painting
- Electronics and programming JBox, Control Panel, DAS, PLC
- Heavy duty construction, NEMA, explosion proof
- Custom designed to meet your specifications
- Attention to operator safety
- Installations in 6 continents and 47 countries
- Foreign Language manuals

Wet suppression of bulk material such as trash, coal, ore, limestone, phosphate and other materials to prevent airborne particulates and odors. Stopping dust before it starts.

Spray cannons and stanchions for stockpiles

Pumping System for delivering fluid to spray nozzles

### TYPES/USES

- Dust Suppression for Stockpiles, Conveyors, Truck Dumps, Crushers, Rotary Car Dumps
- Chemical Mixing & Pumping Systems to supply water to spray nozzles
- Odor Control at landfills and wastewater
- Biomass plants
- IR Heaters for Rail Car Thawing

### CUSTOM FEATURES & PARTS

- Compound MR, Chemical Surfactant
- Explosion Proof Electrical Enclosures
- Flow Controllers
- Fiberglass Enclosures
