

JOHNSON MARCH SYSTEMS, INC.

SAMPLING & ANALYTICAL SYSTEMS

DESIGN ADVANTAGES

- Fabricating since 1978
- ISO 9001 Certified by UL
- Professional engineers
- Experience in Power, Oil, Gas, Mining, Wastewater, Cement, Petrochemical, LNG, etc.
- Chemical Feed Systems, Sampling Panels, Electrolytic Chlorination, Ammonia Systems, Dust Suppression
- Single contact point for multiple packages on project
- Prefabricated enclosures
- In house fabrication
- Sandblasting & painting
- Electronics and programming JBox, Control Panel, DAS, PLC
- Heavy duty construction, NEMA, explosion proof
- Custom designed to meet your specifications
- Attention to operator safety
- Installations in 6 continents and 47 countries
- Foreign Language manuals

To monitor and maintain proper chemistry within the process by taking samples to analyze for levels of pH, conductivity, silica, sodium, solids, chlorine, DO, TOC, etc.

TYPES/USES

- Steam & Water Sampling for Boilers and HRSG's
- Retention Ponds & Effluent
- Cooling Tower Basins
- Condenser Tube Leak Detection

OPTIONS

- Prefabricated Buildings
- Sunshades
- Single Portable Sample Line
- Cabinets
- Closed loop Cooling Water
- Isothermal Baths / Chillers
- Hotwell Sampling
- Sample Booster Pump Skid
- Isokinetic Nozzles

CUSTOM FEATURES & PARTS

- High Pressure Blowdown
- Blowdown Flash Tanks
- Sample Pressure Reduction
- Sample Pressure Regulators
- Sample Backpressure Valves
- Sample Relief Valves
- Primary & Secondary Sample Coolers
- Sample Pressure Indication
- Analyzer Multi-Sample Sequencing
- Sample Temperature Indication
- Sample Cooler Relief Valves
- Sample Filters
- Analyzer & Total Flow Rotameters
- Sample Recovery Systems
- Air Cooled Heat Exchangers
- Demineralized Water Flush Systems
- Sample Degassed Conductivity Reboilers
- Cation Columns
- High Temp Shutoff & Alarm
- Sample Line High Temperature Insulation
